REVISION LIST – C3S2
DIGI-ROOMS: WEB-BASED FACILITY RESERVATION AND MANAGEMENT SYSTEM FOR NUESTRA SEÑORA DE ARANZAZU PAROCHIAL SCHOOL

RED-RL-C3S2-FY	**Panelist:**	Dean Frederic Yulo		**Date evaluated:**	

Code	Revisions/Questions/Comments	Action(s) taken / Section addressed	Page(s)	Verdict
FY1	Your problems are not equal and aligned with each other. Align the specific objectives with the specific problems.	Aligned the specific problems to specific objectives.		
FY2	Lack of supporting documents shown that will support the claims of the presenters. Failed to show the tools used in their research like questionnaire, interview, at least a picture of the logbook that shows the record of the previous reservations including the list of the problems encountered. Tools that were used in the research must be available during the defense/presentation to be data driven.	Placed in Appendix B: Resources; Appendix C: Letters; and Appendix E: Interview Transcripts.		
FY3	Feasibility study that could tell whether the system is more beneficial than just an expense.			
FY4	No signed transcript of interview.	Placed in Appendix E: Interview Transcripts.		
FY5	No letter of acceptance as client-developer.			
FY6	No business process/flow was shown. I suggest using a flowchart for visual and easier presentations.			
FY7	I suggest establishing the current manual process and how you want to improve it through your proposed application.	Established in Project Context and Methodology.		
FY8	Part of your limitation is messaging is not included. Why? The objective of IT developers is to lessen the number of time in processing transaction/s. Messaging is beneficial to all users.	Explained further in Limitations.		
FY9	How many employees per campus? (Teaching and non-teaching)	Added to Project Context.		
FY10	Who can request/reserve facility?	Expanded modules mentioned in Scopes and Limitations to include the access levels of each user types.
