Mr. Frederic Yulo

Revisions/Questions/Comments	Addressed in section	Page
Your problems are not equal and aligned with each other. Align the specific problems with the specific objectives.		
Lack of supporting documents shown that will support the claims of the presenters. Failed to show the tools used in the research such as questionnaire, interview, or at least the picture of the logbook that shows the record of the previous reservations including the list of the problems encountered.		
Feasibility study that could tell whether the system is more beneficial than just an expense.		
No signed transcript of interview.		
No letter of acceptance as client-developer.		
No business process/flow was shown. Use a flowchart for visual and easier presentations.		
Establish the current manual process and how you want it to improve it through your proposed application.		
Part of your limitation is "Messaging is not included". Why? The objective of IT developers is to lessen the number of times in processing transactions. Messaging is beneficial to all users.		
How many employees per campus? (Teaching and non-teaching)		
Who can request/reserve facilities?		
Where is the guideline in borrowing/reserving a facility provided by your client? Provide the guidelines, school policy in term of facility usage.		
How many rooms need reservations or must go through the process of reservation?		
How many students enrolled per campus?		
Do the school share resources/facilities?		
How many users, facilities?		
How will you expedite the procedure?		
Cite the improvement from manual to your proposal.		

Mr. Mark Saledio

Do you have your journal?		
If a new room was added, how will you process that?		
Who has access in the system?		
Are students allowed to use it?		
"To prevent scheduling conflicts with immediate automated notifications". Can you explain?		
"Interactive map module". How?		
"Floor plan upload". How?		
How many rooms/equipment/laboratories are we talking about?		

Mr. Ry Vincent Uy

Revisions/Questions/Comments	Addressed in section	Page
Introduction is too lengthy and seems padded. Trim.		
"Admins" create and approve?		
Paper did not mention users as having permission to create utilization request.		
Lack of supporting documents.		
Corrections in scopes and limitations.		
Speaking. Improve communication skills.		
Proper analyses and applied data processing.
