Introduction

NSDAPS Digi-Rooms is a web-based reservation system developed for the benefit of the General Services Unit and faculty of Nuestra Señora De Aranzazu Parochial School. Developed as an IT Capstone Project by Elmer Jr. Felisilda, Daisy Borbe, and Rechelle Golimlim, this program assists teachers, staff, and the General Services Unit in creating, approving/rejecting, managing, and tracking reservation requests for rooms and facilities across the two campuses of the institution.

Accessing the online system

Links to access

Main link
https://nsdaps-digirooms.online
Alternative link
https://nsdaps-digirooms.netlify.app

System Requirements

Any modern device (e.g., desktop, laptop, phone) that is able to run a modern web browser (e.g., Google Chrome, Microsoft Edge, etc.), can access the system.

Keeping your Credentials

Please keep note of the email used during your account registration. Currently, you can't change your email address once it is active. Make sure that the email you use in registration is accessible to you at all times as system notifications and updates are sent through them.

Your email address	Your password

Support and Feedback

Technical support and feedback may be directed to any of the contacts below.

Developer email	elmerjrgfelisilda@gmail.com

Registration, Login, Password Reset

In order to use NSDAPS Digi-Rooms, you must first create an account. This account is tied to the email you use, so please choose a valid and active email.

How to register an account

		Step 1: Access the site and click Register.
---	---	---

	Step 2: Fill in your email address, last name, first name, and password. Please make sure that your name is correct. Your password must have at least: • 8 characters • 1 uppercase letter • 1 lowercase letter • 1 number • 1 special character Step 3: After filling in the necessary information, press Send account verification link.
	Step 4: Wait until this window appears. Afterwards, check your email for the verification link.
	Step 5: You should receive an email with the subject "Verify your Digi-Rooms account". Press Click here to verify your email. Step 6: Wait until a confirmation window appears. Your account had been verified. You need to wait for the administrator to approve your registration in order to actually use the system.

	Step 7: Once your account registration had been approved, you will receive an email with the subject “Your Digi-Rooms account has been approved and is now active”. You can now use the credentials you created to enter the website.
---	--

How to log into the system

1. Open NSDAPS Digi-Rooms.
2. Enter your registered email and password.
3. Click **“Log in”**.

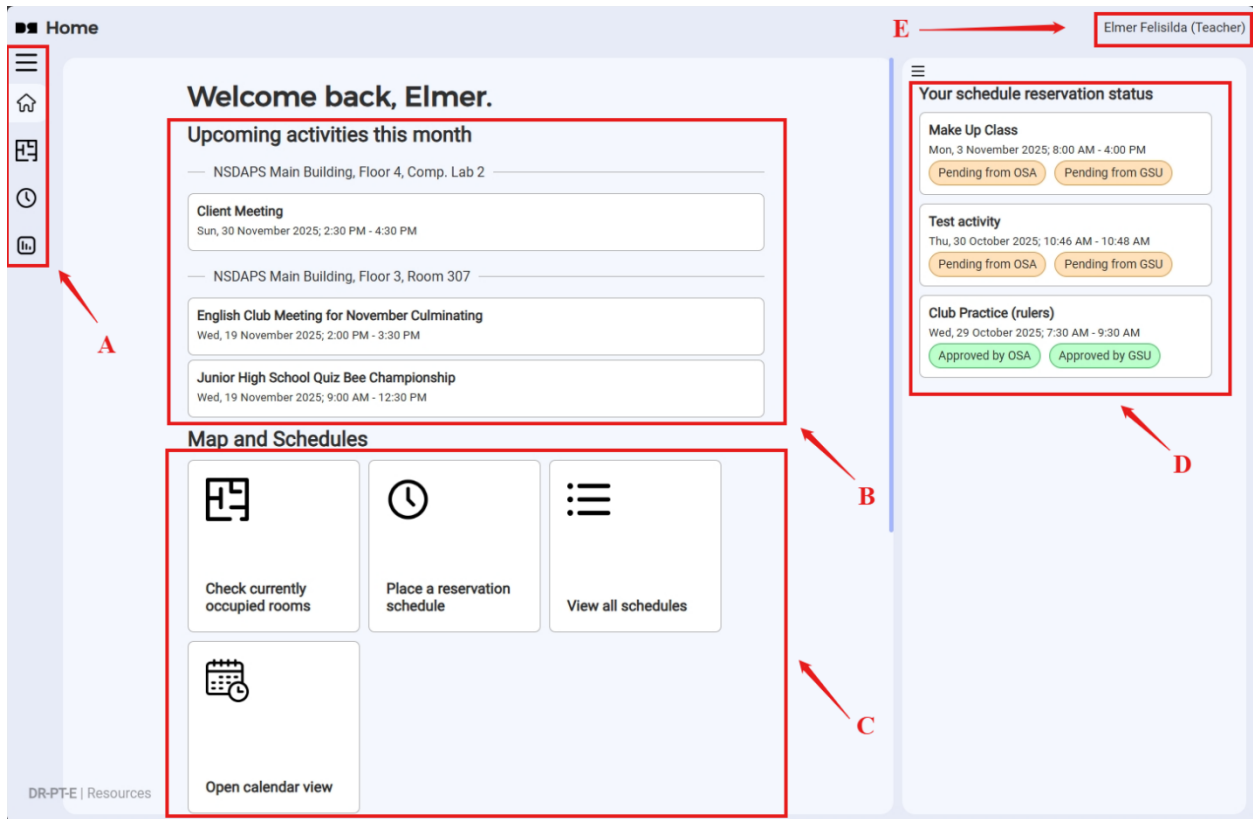

You can only log into the system once your account had been **approved** by the administrator.

How to reset password if you forgot it

1. Open NSDAPS Digi-Rooms.
2. Click **“Forgot Password?”**
3. You will be asked to enter the email address of your account. Please type it into the given field.
4. Click **“Send password reset email”**.
5. Wait until the system confirms that it had sent an email.
6. Check the email address you entered if it receives an email with the subject **“Reset the password of your Digi-Rooms account”**.
7. Click **“Click here to reset your password”**. You only have one hour before this link expires.
8. You will be asked to enter a new password twice. Click **“Submit”** afterwards.
9. You may now use your new password to log into the system.

The Home Screen

Anatomy

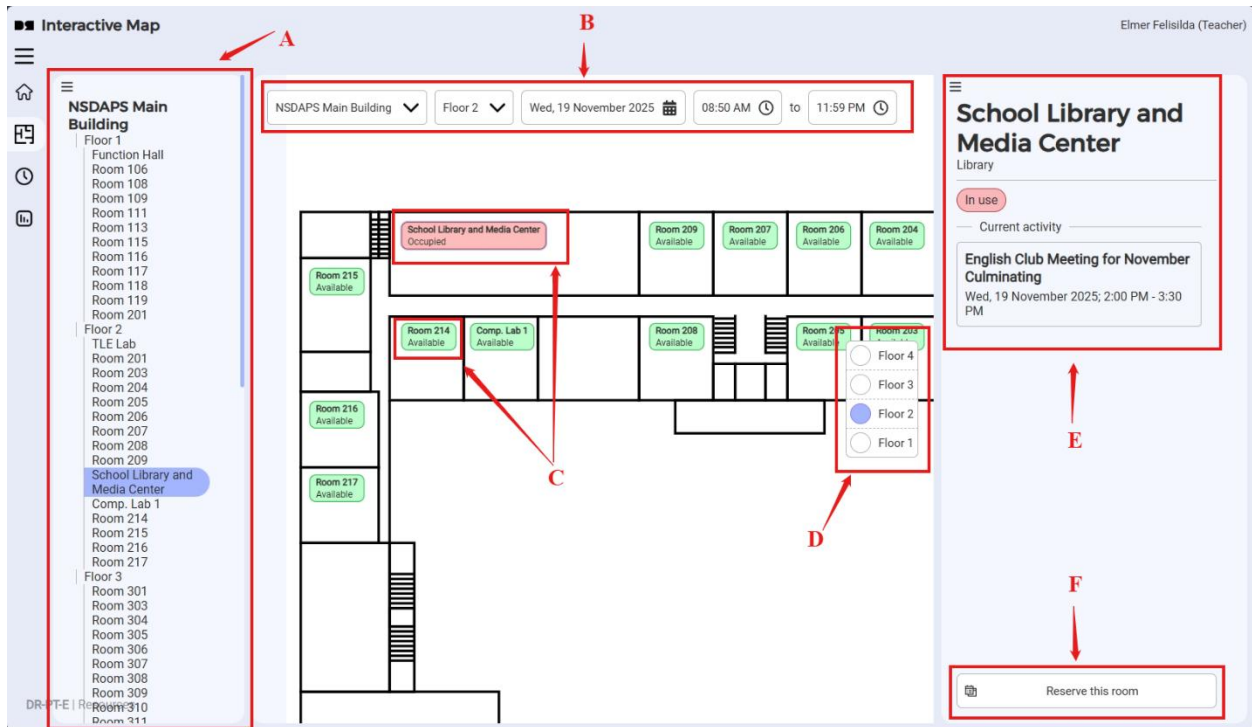

A – Navigation rail / sidebar This is where modules such as the interactive map can be accessed.	B – Upcoming activities Upcoming fully approved activities are listed here, separated by room and date.
C – Quick actions Action tiles for frequently used functions.	D – Reservation status A quick view on your reservation request status.
E – User account Clicking your name on the top-right corner opens your account management screen and log out options.	

The Interactive Map

The Interactive Map is an easy way to see room occupancy on selected dates and time. You can switch building, floors, date, and time.

Anatomy

A – Directory Displays the hierarchical list of all buildings, floors, and rooms available in NSDAPS Digi-Rooms.	B – Map Parameters This contains information for the building, floor, date, and time that dictates how the map will be displayed.
C – Room Markers Corresponds to a singular reservable room/facility.	D – Floor Selector Alternative to the map parameters, you can use this to easily switch floors in a building.
E – Room Information The room you select on the directory or the map will display its status here along with the current activities if applicable.	F – Reserve Room Clicking this will bring you to the “Create a Reservation” screen that will have the room automatically set to the one you selected here.

Room Marker Color Coding

A room marker changes colors depending on its status on the selected map parameter.

Green	Yellow	Red
There are no activity (aside from class hours) happening at this period.	There is an activity pending for approval at the set time.	There is an activity fully approved to use the room at the set time.

How to use the Interactive Map

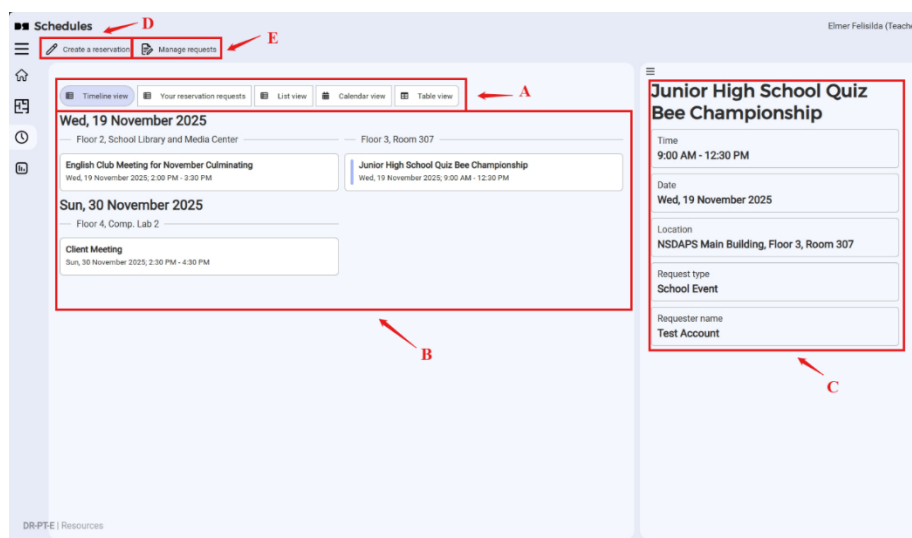

1. From the sidebar, click “Interactive Map.”
2. Use the top panel to
 - a. Select a Building (Main or Annex)
 - b. Choose a Floor Level
 - c. Adjust the Date and Time to see availability
3. Click a room marker to display its information.
4. Use this map as a visual guide before making a reservation.

From here, you can click “**Reserve Room**” to open the “Create a Reservation Screen” with the current room selected.

The Schedules Screen

The Schedules Screen shows all the fully approved activities in a variety of viewing options, including ones to manage your own reservation requests.

Anatomy

A – View Selector Allows you to switch between different views to view the schedules list.	B – Schedules List This displays the list of fully approved schedules based on what you selected from the View Selector.
C – Schedule Information Shows you the information of a selected schedule.	D – Create a Reservation Clicking this will open the “Create a Reservation” screen.
E – Manage Requests Clicking this will open the “Manage Requests” screen where you can view your reservation requests in more detail.	

Different view options

Timeline view

- Arranges the schedules by date and rooms.

Your reservation requests

- Shows all your reservation requests easily without going to the “Manage Requests” screen.

List view

- Shows all the schedules in a linear list that you can search through.

Calendar view

- Shows an interactive calendar. Clicking on any of the dates will open the “Create a Reservation” screen with that date selected.

Table view

- Shows an interactive weekly timetable. Clicking on any of the cells will open the “Create a Reservation” screen with that time range selected.

The Create a Reservation Screen

This is where your booking of reservations happens. There are 3 distinct steps before your request is officially made.

Anatomy

Step 1: Request Information

The screenshot shows a web form titled "Create a reservation". At the top, there are four steps: "Step 1: Request information" (active), "Step 2: Schedule information", "Step 3: Finalize request", and "Step 4: Send request". Below the steps, the instruction "Please specify the nature of your reservation." is displayed. The form contains several input fields: "Activity name" (with a red asterisk), "Description", "Activity type" (a dropdown menu), "Requester name", "Requester email", and "Requester type". To the right of these fields are "Subject" (a dropdown menu), "Attendees" (with a "+ Edit" button), and "Equipment" (with a "+ Edit" button). At the bottom, there are "Cancel" and "Next" buttons.

Activity Name Type the name of your activity here.	Subject Additional context for academic and non-academic activities.
Description A brief description of your activity. This can help provide more context to the staff.	Attendees Additional context for activities that only have specific attendees (like a meeting or consultation). You can add specific people in the list.
Activity Type Select a type from the dropdown that best describes your activity.	Equipment If your activity requires equipment, you can select from the provided list to add to your request. Take note that the staff may remove or add equipment.

Requester name, email, type These are fields that are automatically filled with your account information.	
---	--

General tip for adding request information

- Make sure to keep your titles and descriptions as concise as possible while still providing enough context for the staff when checking your request for approval.

Step 2: Schedule Information

Create a reservation

Step 1: Request information | **Step 2: Schedule information** | Step 3: Finalize request | Step 4: Send request

Please select a room and schedule for your reservation.

Location

Building: * NSDAPS Main Building

Floor: * Floor 2

Room: * School Library and Media Center

Choose from the interactive map

Schedule

Start time: * 09:01 AM

End time: * 09:01 PM

Date: * Wed, 19 November 2025

Schedule conflicts

1 schedule conflicts found.
 These schedules have already been approved. You can't submit your reservation at the same room and time as these schedules. Please pick a different time or room.

English Club Meeting for November Culminating
 Wed, 19 November 2025; 2:00 PM - 3:30 PM

Next

Brief summary

This step provides you with a brief summary of your schedule for final checking. Clicking Next from here will attempt to submit your request for approval.

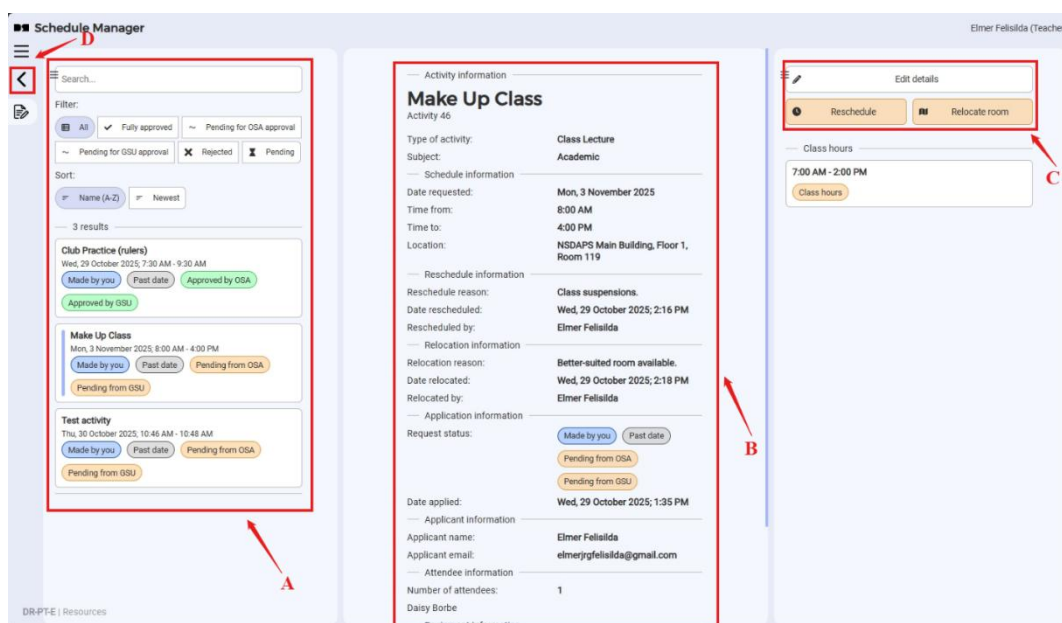

How to create a reservation

1. From the sidebar, click **"Schedule Management"**.
2. Click **"Create a reservation"**.
3. The "Create a reservation window will open.
4. Fill out the necessary fields for **Step 1: Request Information**.
 - a. Take note that specifying an **Activity Name** and **Activity Type** is required.
5. Click **"Next"**.
6. Fill out the necessary fields for **Step 2: Schedule Information**.
 - a. As you choose a room and schedule, the system will perform conflict checking automatically. If a schedule conflict is found, the system will suggest alternative time slots and rooms.
 - b. You cannot proceed if there are conflicts detected with your schedule. Please adjust it accordingly.
7. If there are no conflicts detected left, click **"Next"**.
8. Double check your reservation details in **Step 3: Finalize Request**.
 - a. You may go back and correct any details if necessary.
9. Once you are sure, click **"Next"**. Wait for the request to be sent.
 - a. Once sent, your reservation will now enter the approval process. Requested activities must first be approved by the Staff/OSA, then finalized by the Administrator from the GSU.

The Manage Requests Screen

This screen allows you to view your reservation requests in more detail.

Anatomy

A – Schedules List This displays the list of all your schedules.	B – Schedules Information This displays all the information related to the selected reservation.
C – Schedule Actions If the selected schedule is pending for both OSA and GSU approval, you can use these to edit your reservations.	D – Back Clicking this will bring you back to the Schedules Screen.

How to edit a reservation

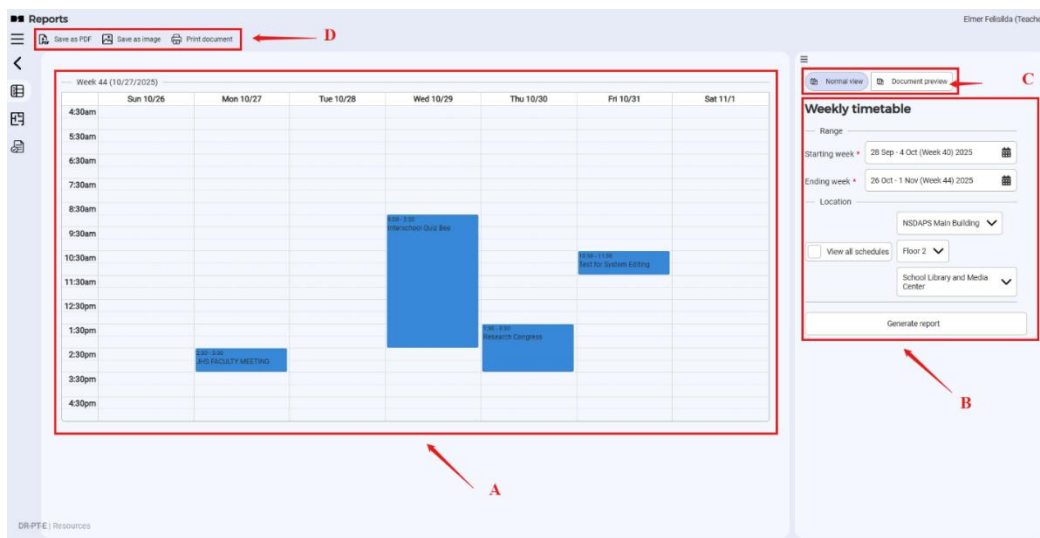

1. From the sidebar, click **"Schedule Management"**.
2. Click **"Manage Requests"**.
3. Select the schedule from the **Schedules List**.
4. Select an edit action from **Schedule Action**.
 - a. Edit details
 - i. Modify reservation details such as name, attendees, etc.
 - b. Reschedule
 - i. Modify the scheduled time and date of the reservation.
 - c. Relocate
 - i. Modify the requested room.
5. Specify an edit reason for your action.

Take note that you can only edit your reservation details if it is still pending for both Staff/OSA and GSU approval.

The Reporting Screen

The Reporting Screen allows you to generate reports from your own schedules, especially reservation slips for documentation purposes. These reports can be exported as PDF, images, or printed via your browser's print dialog.

Anatomy

A – Report Output

This displays the generated data based on the report parameters.

C – View Switcher

This changes the report output view between Normal and Document preview.

B – Report Parameters

This allows you to fine tune the generated report via date ranges, filter options, etc.

D – Export Options

Clicking these allows you to export the generated report as a PDF or image, or print it via your browser's print dialog.

Normal view vs. Document preview

Normal view

This view displays the report as it is from your device screen.

Different Report Types

Monthly Schedule Timetable

- Generates a monthly table of all reservations within a selected month range.

Schedule Timetable

- Generates a timetable of all reservations within a selected week range and room location.

Map Overview

- Takes a snapshot of the Interactive Map within a selected date, time range, and floor.

Reservation Slip

- Generates a reservation slip based on a selected schedule, along with any information related to it.

Accounts List

- Generates a list of all accounts.

User Trail

- Generates an activity log within a selected date range and account.

Room Utilization

- Generates a room utilization report within a selected date range and room.

Activity Logs

- Generates an activity log within a selected date range.

How to generate a report

1. From the sidebar, click **"Report Generation"**.
2. Select a report type.
3. Enter necessary parameters on **Report Parameters**.
4. Click **"Generate Report"**.
5. Wait for the **Report Output** to update.

How to export a report

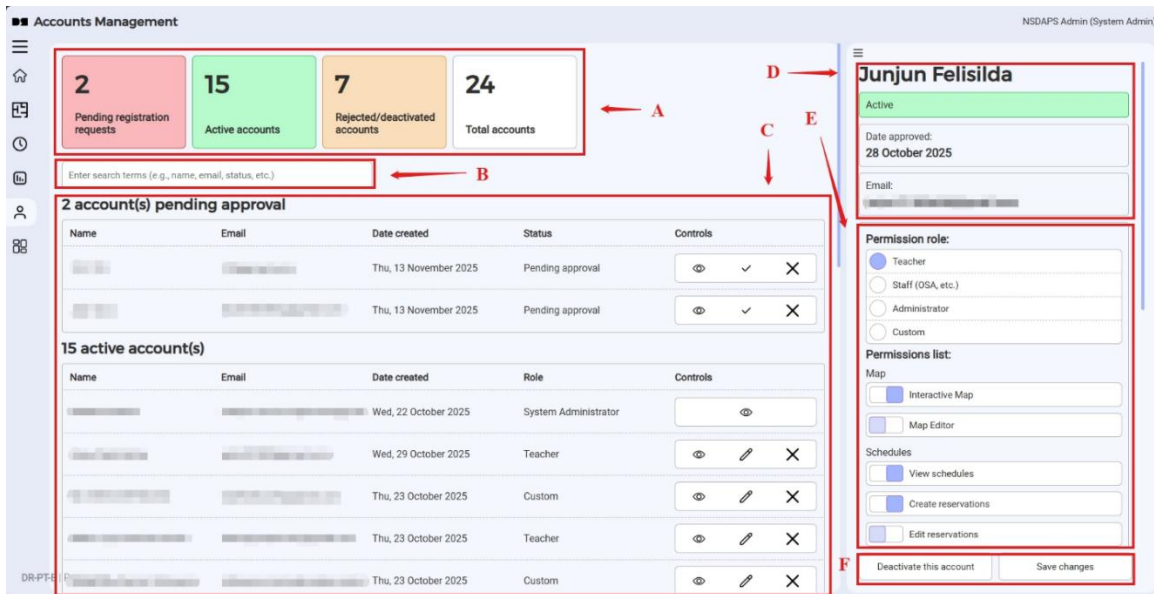

1. Click **"Export as PDF"**, **"Export as Image"**, or **"Print Document"** from the **Export Options**.
2. Specify a file name.
3. Click **"Save"**.
4. Wait for the document to download into your device.

Please take note that it may take a while for the document to download, especially if it involves multiple pages.

The Accounts Management Screen

This screen controls user access and permissions within the system.

Anatomy

A – Overview This displays the total counts of accounts with specific statuses.	B – Search bar This allows you to search for specific names or emails within the list.
C – Account List This displays the list of all accounts registered within the system. Each row represents one account.	D – Account Information Clicking a row from the account list opens its information.
E – Permission List This displays the roles and specific permissions an account may have.	F – Account Actions This displays actions that may be done to a specific account. Actions depend on the current account state.

How to approve registration requests

1. From the sidebar, click **"Accounts Management"**.
2. Review the pending registration requests in "Account(s) pending approval".
3. Click a specific row to open its account information.
4. Click **"Approve"** or **"Reject"**.
 - a. If you are clicking **"Reject"**, you are required to specify a reason for your rejection.
5. The account's status will change accordingly. You may then tweak their permissions and click **"Save changes"**.

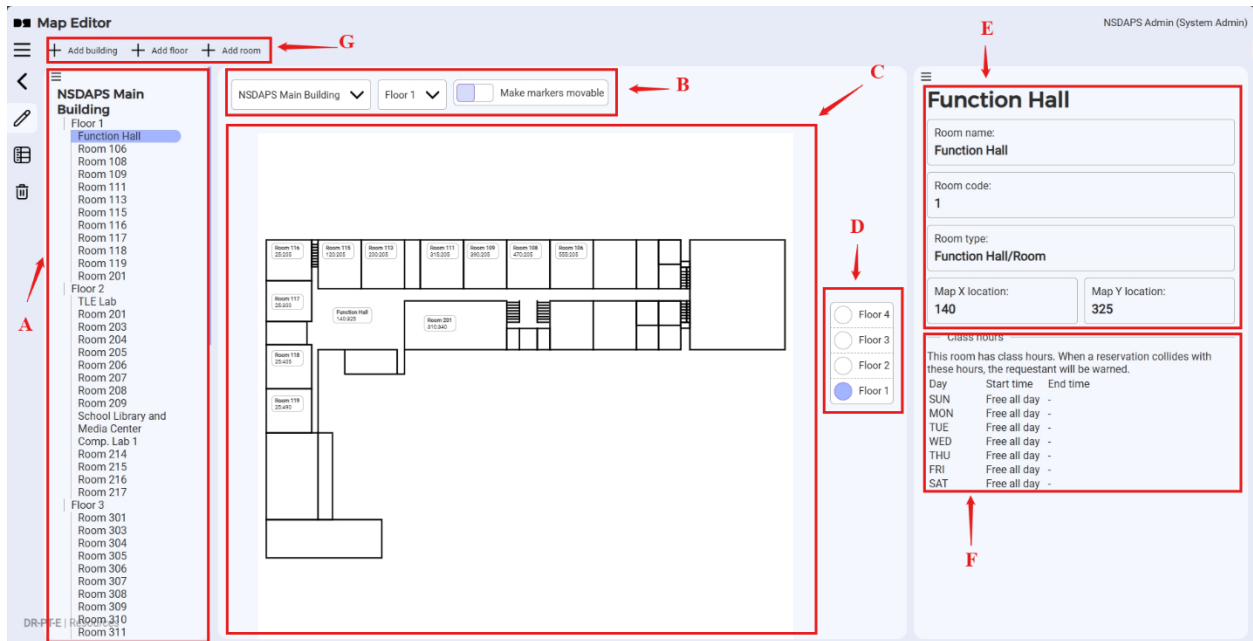

Please take note that changes you make to the account will be communicated to its user through email.

The Map Editor Screen

The Map Editor allows administrators to maintain and update campus layouts. This ensures the interactive map remains accurate and scalable.

Anatomy

Map View

A – Directory Displays the hierarchical list of all buildings, floors, and rooms available in NSDAPS Digi-Rooms.	B – Map Parameters This contains information for the building, floor, date, and time that dictates how the map will be displayed.
C – Map Shows the currently loaded floor and floor plan alongside the room markers associated with it	D – Floor Selector Alternative to the map parameters, you can use this to easily switch floors in a building.
E – Room Information The room you select on the directory or the map will display its status here along with the current activities if applicable.	F – Room Restrictions Displays the restrictions for class hours specified in the room.
G – Addition Options Options to add a building, floor, or room.

A – Overview

This displays the total counts of accounts with specific statuses.

B – Expand/Collapse Options

These control whether to expand or collapse the map hierarchy.

C – Map Hierarchy

Displays the hierarchy of buildings, floors, and rooms within the system.

How to add items using the Map Editor

1. From the sidebar, click **“Interactive Map”**.
2. Click **“Map Editor”**.
3. The system will load the first building and floor.
4. To add a new item, click **“Add building”**, **“Add floor”**, or **“Add room”**.
 - a. This will open the necessary creation window. Fill in the necessary information and click **“Add item”**.
5. For room markers, toggle **“Make markers movable”**. This will make the room markers in the map draggable.

How to edit items using the Map Editor

1. From the sidebar, click **“Table view”**.
2. Select a row from the **Map Hierarchy**.
3. Click the pencil icon / Edit button to switch the **Room Information** into edit mode.
4. Update its information.
5. Click **“Save changes”**.

How to delete items using the Map Editor

1. From the sidebar, click **"Table view"**.
2. Select a row from the **Map Hierarchy**.
3. Click the pencil icon / Edit button to switch the **Room Information** into edit mode.
4. Click **"Delete this item"**.
5. A confirmation window will appear. Click **"Delete item"**.
 - a. Deleting an item will also delete its children. For example, if you delete a building, all the floors and rooms under it will also be deleted.

How to restore items using the Map Editor

1. From the sidebar, click **"Bin view"**.
2. Select a row from the **Map Hierarchy**.
3. Click the restore icon / Restore this icon.
4. You have 2 options:
 - a. Restore item only
 - i. This will only restore the currently selected item.
 - b. Restore item and all its children
 - i. This will restore the currently selected item along with all its children. For example, if you restore a deleted building, all the floors and rooms under it will also be restored.
